Durable
Paintable
Wood Appearance
50 Year Warranty

Fiberglass gutter is the first polyester resin based pultruded fiberglass gutter. There are many advantages of fiberglass gutter including longevity, corrosion resistance, less maintenance and aesthetics. After many years of research and development we have brought a product to market that is now cost effective, stronger than fiberglass counterparts and should last forever.

Available in 27'6" and 40' lengths

Weight: 1.45 (G60) & 1.65 (G90) lbs per foot

Remarkable Features

Resists Rot, moisture damage and is significantly more impact resistant than any other type of gutter.

Fantastic Appearance

Fiberglass Gutter was invented with the premise that it needs to look like wood. Fiberglass gutter is a direct representation of 4x5 & 4x6 wood gutter without the maintenance issues.

Minimal Expansion and Contraction

Our proprietary formula does not have the thermal expansion and contraction issues of other composite products. Bonded to a molecular level with a **seamless** finish.
